

### INTRODUCTION

The Metravi PH-600 pH Meter is a high-precision water quality testing meter. It is a handy instrument used for pH testing applications including drinking water, swimming pools, spa, aquariums, reverse osmosis systems, food & beverage, hydrotherapy, hydroponics, etc.

- **Easy to Use:** Simply immerse the pH meter electrode in the solution to be tested, readings are quickly display on a large LCD display.
- **Auto Calibrated:** in-built calibration with 2 buffer powders. Just press a button to finish the calibration. Comes factory calibrated.
- **Fast and Accurate Results:** No need to work with those annoying colour charts and test strips.
- **Compact Portable Design:** Pocket-size, lightweight and compact. Fit in your bag or pocket for easy, casual carrying.
- **Adopts Advanced Technology and Components:** With a built-in glass electrode of high sensitivity of 0.2mm thickness, it quickly sense and test the liquid H<sup>+</sup> ions and the chip timely collects data and displays accurate levels.

### SPECIFICATIONS

<b>Measuring Range</b>	: 0.00 to 14.00pH
<b>Resolution</b>	: 0.01pH
<b>Accuracy</b>	: ±0.01pH
<b>Probe Type</b>	: Precision glass bulb electrode
<b>Display</b>	: Digital LCD
<b>Power Supply</b>	: 2 x 1.5V (LR44 Button Cells)
<b>Operating Temperature</b>	: 0° to 60°C
<b>Calibration</b>	: Two-point automatic calibration
<b>Dimensions</b>	: 155mm x 31mm x 13mm
<b>Weight</b>	: 50gms
