

WINDOW TINT METER WTM2000

APPLICATION: The high-quality meter can measure the transmittance or haze of all kinds of transparent, translucent samples with parallel plane (such as Automobiles, manufacturing, Aerospace, Glass products sheet: sheet etc.

FEATURES:

- Display: 10mm LCD
- Wave Length-550 Nano meters
- PC Interface -Rs 232C
- Low Battery Indication.
- Time of Testing -4 Second (maximum)
- Lamp Life - 10 Years
- Operating temperature and humidity -On 50°C, < 90% RH
- Sample Thickness -Less than 18mm.
- Power Supply-(Main Unit) 4 pcs x1.5V AAA Size Batteries
(Light Emitter)2pcs x1.5V AAA SIZE Batteries.
- Display Size -14x10mm
- Unit Size -141x65x52mm.
Light Emitter Size -70x 62x52mm
- Accessories: Instructions Manual, Test Block Carrying Case.
- Optional Access -Cable and Software for PC Interface.

SPECIFICATION:

- Measuring Range: 0~100, Light transmission
- Accuracy: ≤ 2%
