

## R-100

### RESISTANCE DECADE BOX

A precision instrument that allows users to manually select specific resistance values for use in testing, calibration, and circuit prototyping. It's an essential tool in electronics labs, service centers, and educational settings.

The R-100 offers seven Decade ranges of Resistance for product design or calibration check applications with heavy duty, durable construction and separate grounding terminal.

Offers three binding posts permit isolated substitutions, 1% Resistance substitution from 1 to 11,111,110 $\frac{1}{2}$  and values can be changed in 1 $\frac{1}{2}$  increments.

Features 0.3W resistors and 0.3 $\frac{1}{2}$  internal zero resistance.

#### SPECIFICATIONS

Resistance Ranges	1 to 11,111, 111 $\Omega$ in 1 $\Omega$ steps
Internal Resistance	Approx. 0.3 $\Omega$
Power	0.3W Resistors
Connection	Three (3) binding post
Accuracy	1%
140mm×130mm×48mm	140mm×130mm×30mm
260g	295g
